

# Drive Integration

[Doc's Drive Link](#)

## INDEX

1. <i>Generate Client ID</i>	2
2. <i>Configure OpenERP</i>	3
3. <i>Configure Template</i>	4
4. <i>Open Google Docs</i>	5-6
5. <i>OpenERP Records Through Drive</i>	7-8

## 1. Generate Client ID (Only defines rules for your app in Google API)

### Steps :

- Go to [Google Console](#)
- Create New Project
- Now enable Drive API and Drive SDK From Services

- Now Go for Generate Client ID
  - Go to API Access Tab And Click on Create an OAuth 2.0 Client ID
  - Now Add Branding Information And Click on Next
  - In Client ID Setting Set Application Type to **Web Application**
  - And add Hostname (Ex. <https://samplecompany.my.openerp.com>)
  - This will generate **Client ID** and this Client ID will used In OpenERP Configuration

**NOTE:** - Only one time this configuration needed.

- No needs to generate client ID for all user.

- No need to configure this even if for New Database.

For More [Generating OAuth2](#)

## 2. Configure OpenERP (Admin and Manager)

### Steps :

- Log In through Admin
- Install **Google Drive integration** Module
- Go to **Setting > Companies > Companies** Open Your Company  
In **Configuration** Tab Set Google Client ID(Client ID Received From Google Console)

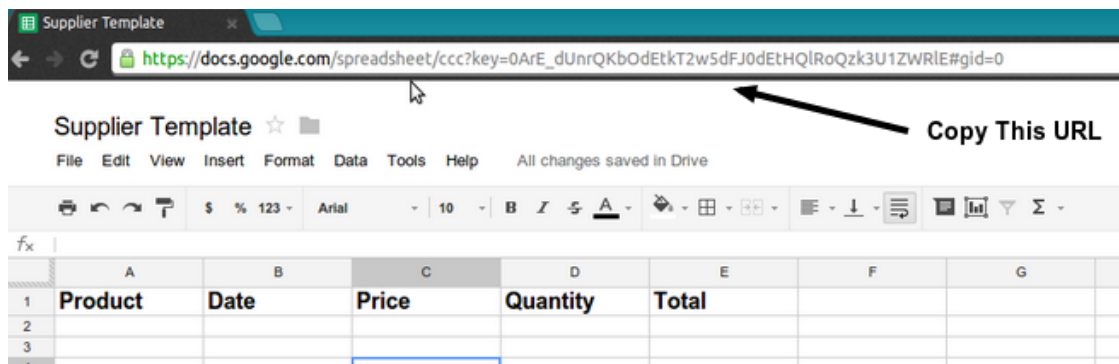

**NOTE:** - Every time you created New Database or New Company This configuration required  
- You can use same Client ID for Every Database or Company

### 3. Configure Template (Admin and Manager)

- Add Template Name (Ex. "Supplier Docs")
- Model(In Which Model You want This Template)(Ex."Partner")
- Now Add Filter If you want to add this template on particular group of record (eg if i want to add this template on only supplier)

<b>Filter Name</b>	Supplier	<b>User</b>
<b>Model</b>	Partner	<b>Default filter</b>
<b>Domain</b>	[['supplier', '=', 1]]	
<b>Context</b>	{ 'lang': 'en_US', 'tz': 'Europe/Brussels' }	

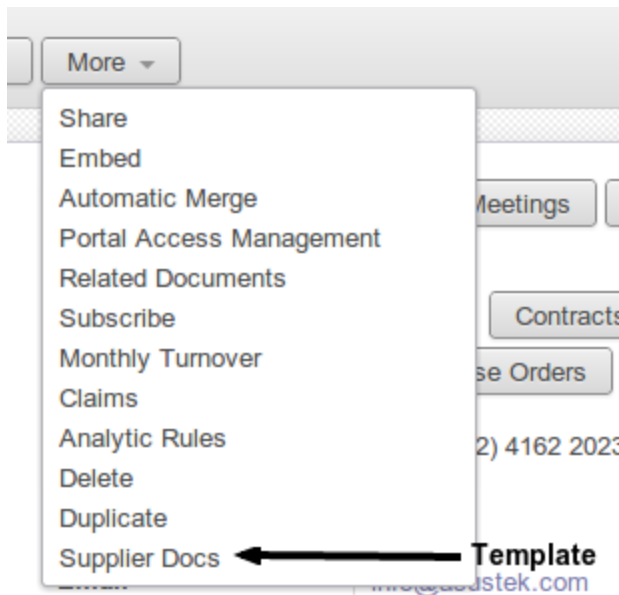

- Template URL will be URL of Doc from Google Drive

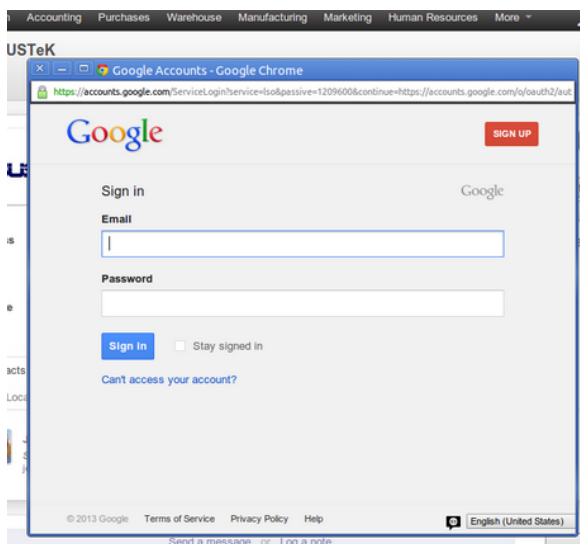

- And add Pattern Name (eg. %(name)s\_%(model)s\_%(filter)s\_gdrive )  
This will be Your New Doc Name In Drive

## 4. Open Google Docs (Users)

1. You will find template in records according to template you set.

2. On click that template, if user login in his google account this will jump to next step otherwise one pop-up come up. And User needs to provide his/her Gmail ID and Password.

3. If User have access to this Template ,this will **generate copy of your template file** in user Google Drive, name it like Pattern Name given in Template and open copied template in pop-up.

4. If User not have access to that Template He/She needs to send access request to Owner(Admin) of this doc.

**You need permission to access this item.**

You are signed in as [redacted] **@gmail.com**, but you don't have permission to access this item. You can request access from the owner or choose a different account. [Learn more](#)

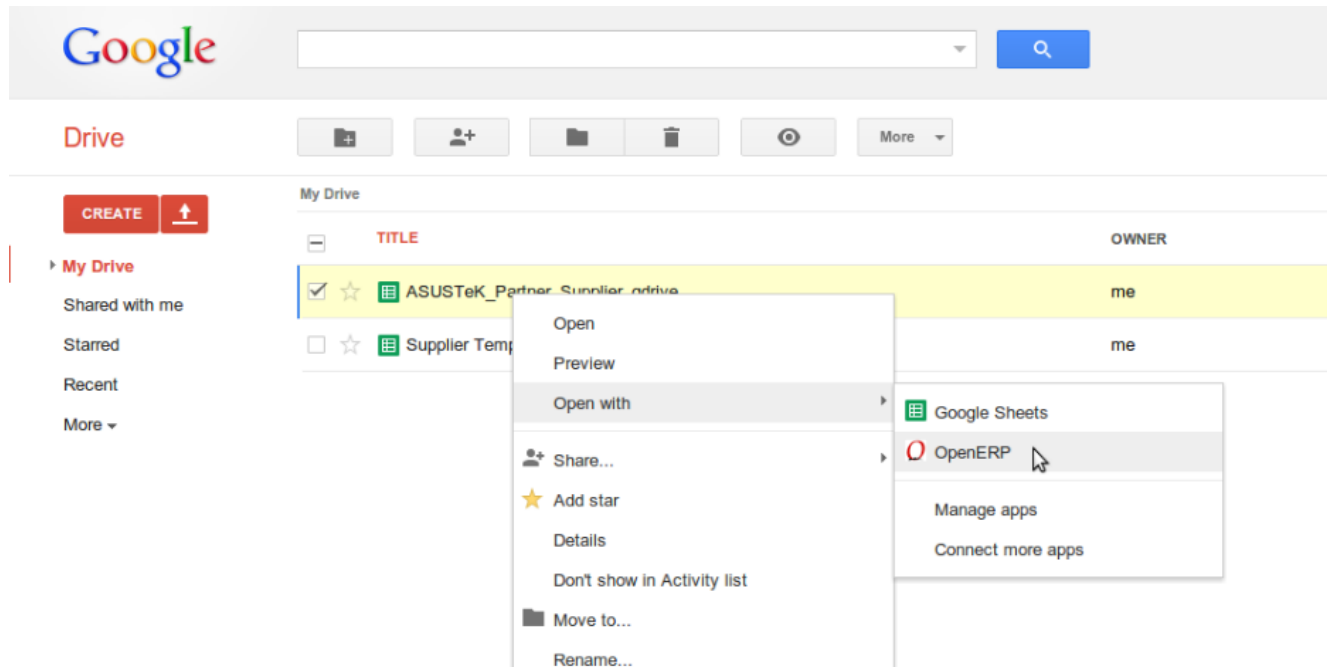

[Request access](#)

[Choose a different account](#)

## 5. OpenERP Records Through Drive

(Only recommend not Require)

- Now what if there are more than 500 records and which google doc from which OpenERP record.
- There are two ways for knowing which Google Doc from which OpenERP record
  - **First One**(Needs to configure) is right click on Google doc and Open With OpenERP

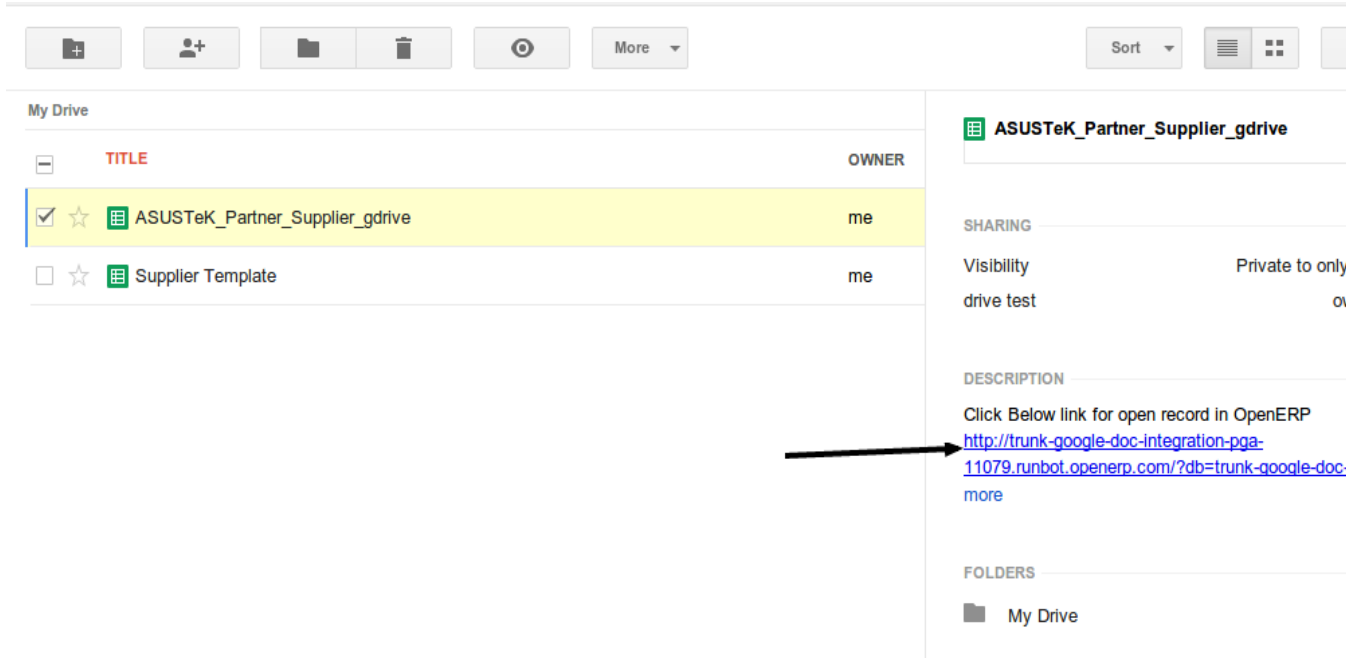

### How to Config This

- Go to [Google Console](#) (Login with same id used before)
- Click on **Drive SDK** Tab
- Add Application Info And Icons
- Add OpenURL (localhost will not work)
  - Ex.**add any **list view** url from openerp Example Open Quotation List View And Copy its URL Add as a OpenURL
- Add This two Default MIME Types
  - application/vnd.openxmlformats-officedocument.wordprocessingml.document
  - application/vnd.openxmlformats-officedocument.spreadsheetml.sheet
 For Other MIME Type Try This link [Open Files](#)
- Set **Import** to **True**
- Now Save Changes

**NOTE:** - Only one time this configuration needed.  
 - Automatically applied to all user.

**Second One** (No needs to configure) is right click on google doc record then click on Details. In doc description you will find the link of that openerp record.

The screenshot shows the Google Drive interface. At the top, there are icons for creating a new file, sharing, folder, trash, and search, along with a 'More' dropdown. Below this is the 'My Drive' section. A table lists files with columns for selection, title, and owner. The file 'ASUSTeK\_Partner\_Supplier\_gdrive' is selected and highlighted in yellow. To the right, the file's details are shown, including its name, sharing settings (visibility set to 'Private to only'), and a description. The description contains a link to an OpenERP record: <http://trunk-google-doc-integration-pga-11079.runbot.openerp.com/?db=trunk-google-doc-...>. An arrow points to this link. The 'FOLDERS' section at the bottom shows 'My Drive'.

	TITLE	OWNER
<input checked="" type="checkbox"/>	ASUSTeK_Partner_Supplier_gdrive	me
<input type="checkbox"/>	Supplier Template	me

**ASUSTeK\_Partner\_Supplier\_gdrive**

**SHARING**

Visibility: Private to only
